EXAMINER

LEE, JOHN D

ART UNIT

PAPER NUMBER

2874

DATE MAILED: 02/12/2003

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 09/852,719	Applicant(s) EMBERTY ET AL. <i>W</i>	
	Examiner John D. Lee	Art Unit 2874	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-19 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 1-9 is/are allowed.
- 6) ☒ Claim(s) 10-19 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 10 May 2001 is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on ____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. ____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

The single sheet of drawing submitted with this application is objected to by the Examiner because it is covered almost in its entirety with a dark speckle (appears as if it were copied on a defective copying machine). Submission of an acceptable sheet of drawing is required in response to this Office action. Note that drawing requirements are no longer held in abeyance.

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claims 12, 15, 16, and 18 are objected to because of the following minor informalities: in line 5 of claim 12, "said digital" should actually be "said digital data"; and in line 1 of each of claims 15, 16, and 18, "reproducing" should actually be "producing". Appropriate correction is required.

The following is a quotation of the second paragraph of 35 U.S.C. § 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 10 and 11 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 10, line 2, there is no antecedent support for the term "said serial-to-parallel bit converter". The claim is thus indefinite. It is believed that claim 10 is intended to depend from claim 5 rather than from claim 1. Claim 11, being dependent on claim 10, inherently contains the same indefiniteness.

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2874

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12-19 are rejected under 35 U.S.C. § 103(a) as being unpatentable over U.S. Patent 5,777,765 to Deloddere et al (submitted by applicant). Deloddere et al discloses an optical delaying unit which is designed to, inter alia, emulate an optical fiber by simulating the delay and attenuation that an optical signal would have within the optical fiber. Although the word "digital" is not used in the reference, the Deloddere et al unit operates on binary communication signals and is therefore clearly a digital device. The person of ordinary skill in the art would obviously have recognized that the optical signal received by the Deloddere et al unit and the electrical signal to which it is transformed are digitally-encoded signals, having transmission codes and data codes of particular lengths. Other than this non-stated feature, the method described by Deloddere et al is essentially the same as the emulation method being claimed. The optical signal is received, transformed to an electrical signal, and delayed for a predetermined time. The electrical signal is then reconverted to an optical signal which has been delayed by the information transfer time of an optical fiber to be emulated. Notice that serial/parallel converters comprise a part of the Deloddere et al delaying unit. The choice of specific values for the lengths of the transmission codes and data codes of the digitally-encoded signals in Deloddere et al would certainly have been obvious to the person of ordinary skill in the art.

Claims 1-9 are allowed.

Claims 10 and 11 would also be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. § 112, second paragraph, set forth in this Office action.

The above claims are deemed to be allowable over Deloddere et al and all other prior art of record because an optical fiber emulator comprising an optical *demodulator*, a digital shift register, and an optical *modulator*, as specified in these claims, is neither disclosed nor suggested.

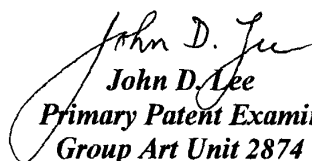

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The U.S. Patent to Watley et al describes an optical fiber emulator, specifically for emulating polarization mode dispersion in an optical fiber.

All of the prior art documents submitted by applicant in the Information Disclosure Statement filed with the application on May 10, 2001, including the U.S. Patent to Deloddere et al relied on in the rejection above, have been considered and made of record (note the attached copy of form PTO-1449).

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. § 103(a), the Examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR § 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the Examiner to consider the applicability of 35 U.S.C. § 103(c) and potential 35 U.S.C. §§ 102(e), (f) or (g) prior art under 35 U.S.C. § 103(a).

Art Unit: 2874

Any inquiry concerning the merits of this communication should be directed to Examiner John D. Lee at telephone number (703) 308-4886. The Examiner's normal work schedule is Tuesday through Friday, 6:30 AM to 5:00 PM. Any inquiry of a general or clerical nature (i.e. a request for a missing form or paper, etc.) should be directed to the Technology Center 2800 receptionist at telephone number (703) 308-0956, to the technical support staff supervisor (Team 2) at telephone number (703) 308-3072, or to the Technology Center 2800 Customer Service Office at telephone number (703) 306-3329.

John D. Lee
